

EV Charging Solutions for General Contractors

Your Partner in Building the
Future of Energy

As demand for EV charging infrastructure accelerates across commercial and residential construction, general contractors are being asked to integrate this technology into new builds—often without clear guidance on where to start. Titan Energy is here to help.

We specialize in working with general contractors to seamlessly integrate EV charging stations into projects of all sizes—from multi-family developments to commercial parking lots.

WHY GENERAL CONTRACTORS CHOOSE TITAN ENERGY

You're focused on delivering high-quality projects on time and on budget. We make sure EV charging supports that mission—not derails it.

We Help You:

- ▲ **Source the Right Hardware:** Level 2 or DC Fast? We'll recommend and supply the right equipment for your scope, usage needs, and site layout.
- ▲ **Maximize Incentives:** We capture all available state and utility rebates—often covering a significant portion of install costs.
- ▲ **Set Up Networked Systems:** From software commissioning to client dashboards, we ensure EV chargers are fully operational, compliant, and user-friendly.

From Budgeting to Turnkey Execution

Whether you're early in design or mid-project, we're ready to step in and provide the level of support you need. Need a partner to handle EV charging from start to finish? We do that, too.
